

Word Bank**Math Words**

- Median
- Mean
- Mode
- Ordered pair
- Parallel
- Relation
- Formula
- Identity
- Event
- Outcome
- Like terms
- Coefficient
- Entry
- Origin
- Graph

## Across

2. numbers that comes up most often
3. middle numbers
4. point labeled zero
6. collection of outcomes
7. number multiplied by a number in a term
10. equation that is for all values of the variable
11. lines across from each other
12. point that corresponds to a number
13. equation that relates 2 or more quantities

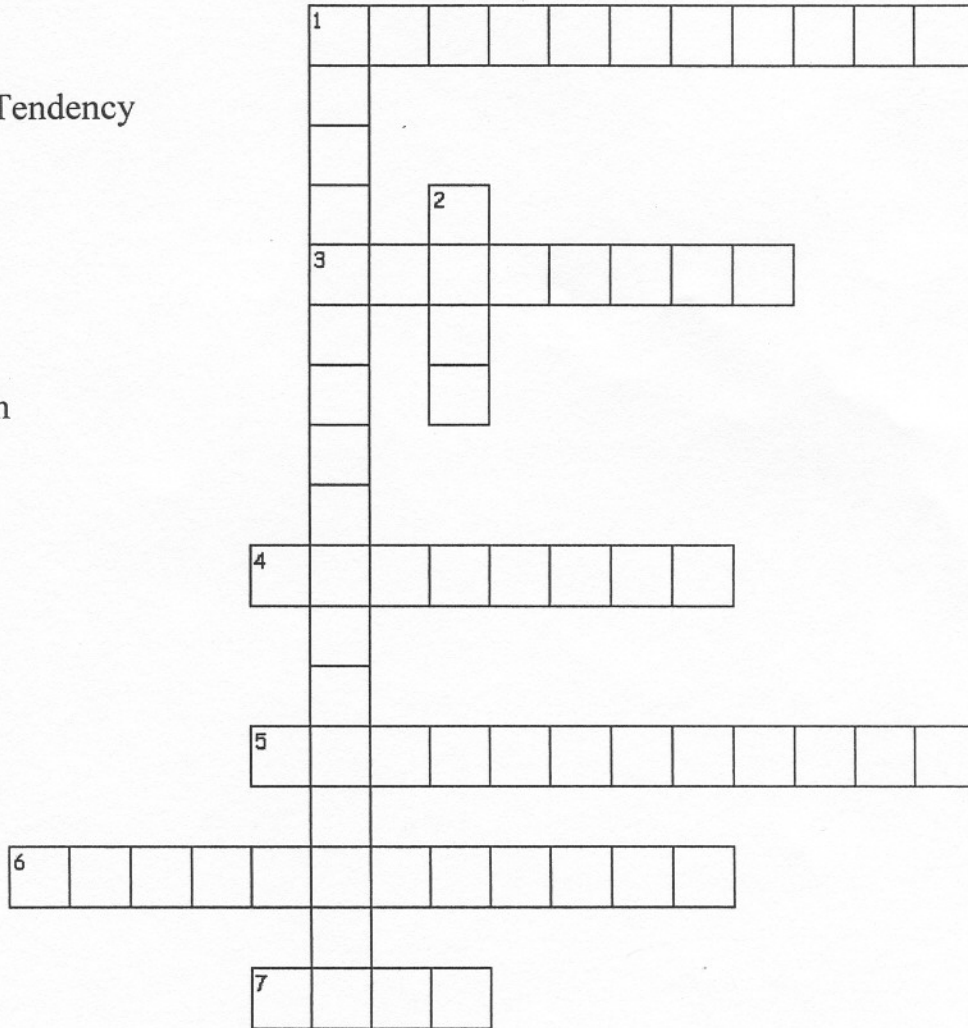

## Down

1. any set of ordered pairs
4. point in plane of real numbers
5. results
6. each number in matrix
8. sum of the numbers
9. terms with same variable

# Math Vocabulary

## Word Bank

1. Equivalent Inequalities
2. Compound Inequalities
3. Linear Inequalities
4. Half-Plane
5. Measure Of Central Tendency
6. Mean
7. Average
8. Relation
9. X-Intercept
10. Y-Intercept
11. Scatter Plot
12. Solving An Equation
13. Identity
14. Unit
15. Rate Of Change
16. Reciprocal
17. Stem
18. Leaf Plot

### Across

1. a graph of numbers that represent real-life situations
3. an equation that is true for all values of variables
4. any set of ordered pairs
5. a comparison of 2 different quantities that are changing
6. if a fraction is a non zero number than its reciprocal.
7. rate a rate per one given unit

### Down

1. finding all the solutions of an equation
2. the sum of N numbers divided
